MRDX technical publications

Business rules

Object code	DMC-MRDX-A-00-00-0000-00A-024A-D	**Issue**	003-00 (revised)
Issue date	2026-01-12	**Language**	en-GB
Responsible partner	AERALIS S.A.S. (U8025)	**Originator**	AERALIS S.A.S. — Data Management (U8025)
Security	02 — Restricted	**Quality assurance**	First verification (tabtop)
Applicability	All MRDX technical data		

1 Scope

This data module records the business rule decisions taken for the MRDX technical publications. It is the human-readable companion of the business rules exchange data module, which holds the same decisions in a form a validator can apply.

A decision recorded here is binding on every author, supplier and partner that delivers data for the programme. A request to change a decision is raised as a comment against this data module.

2 Authoring decisions

2.1 Language and spelling

DECISION BRD-MRDX-0014

All source data modules are authored in British English (en-GB) using Simplified Technical English, ASD-STE100 Issue 8. Translations are held as separate data modules with the same data module code and a different language code.

2.2 Applicability

DECISION BRD-MRDX-0021

Applicability is expressed against the product attributes declared in the applicability cross-reference table. A data module must not state effectivity as free text in a paragraph when a computable statement is possible.

DECISION BRD-MRDX-0022

A display text is mandatory on every applicability statement, so that the printed publication reads correctly when the computable statement cannot be evaluated.

2.3 Illustrations

DECISION BRD-MRDX-0035

An illustration is referenced by its information control number only. The file name is never written into a data module, and an illustration is never embedded.

3 Delivery decisions

Delivery decisions

Data is delivered as a data dispatch note with the data modules, the publication modules and the illustrations it references. A delivery that does not resolve completely is rejected in full; partial acceptance is not used on this programme.
