DATA UPDATE FILE

Object code	UPF-MRDX-U8025-2026-00003	**Issue**	001-00
Issue date	2026-07-20	**Language**	—
Responsible partner	AERALIS S.A.S. (U8025)	**Originator**	—
Security	02 — Restricted	**Quality assurance**	—
Applicability	All		

Update instructions

UPDATE 1 — replace

Update type	replace

```
//dmodule/
identAndStatusSection/
dmStatus/
originator/
enterpriseName[. = 'AERALIS S.A.S. – Technical Data Valmont']
```

Replace the element text with "AERALIS S.A.S. — Technical Data and Services". Apply to every data module of the MRDX model identification code, all issues in work and all released issues that are re-issued after this date.

UPDATE 2 — add

Update type	add

```
//dmodule/
identAndStatusSection/
dmStatus[not(qualityAssurance)]
```

Add a quality assurance element with an unverified child to every data module status that has none. A data module without a quality assurance statement fails the delivery check of the receiving system.

UPDATE 3 — delete

Update type	delete

```
//dmodule/
content/
/para/
@changeType[. = 'delete']
```

Remove the attribute. The delete change type is no longer permitted by the business rules; deleted content is removed at issue instead of being marked.
